# ZAMBO Alfred Yohann E.

Systems, Network & Security Engineer

Yaoundé, Cameroon | +237 6 94 90 45 03 | yohanzambo.28@gmail.com | linkedin.com/in/alfred-y-zambo-8359311a1

## PROFILE

Systems, network and security engineer with 5+ years of experience operating and securing critical IT infrastructure: virtualization, storage, networking and information systems security. Holds multiple certifications in cybersecurity and systems administration, with more than ten projects delivered from design through to production. Combines technical expertise, automation and security best practices to build reliable, highly available and compliant infrastructure.

## TECHNICAL SKILLS

| | |
|---|---|
| **Systems Administration** | ▸ **Servers & virtualization**: HPE ProLiant Gen9/10/11, Dell PowerEdge, VMware vSphere (ESXi, vCenter), Proxmox VE<br>▸ **OS**: Linux (Ubuntu, Rocky, AlmaLinux, CentOS), Windows Server<br>▸ **Services & databases**: DNS/DNSSEC, DHCP, SMTP, SNMP, Nginx, TLS/PKI, Active Directory, MySQL, PostgreSQL, MSSQL<br>▸ **Storage & backup**: HPE MSA 2050/2060 SAN, NAS, Fibre Channel, Veeam Backup & Replication, Proxmox Backup Server<br>▸ **Monitoring**: Prometheus, Grafana, Alertmanager, Nagios<br>▸ **Cloud**: AWS EC2 |
| **Network & Security Administration** | ▸ **Switching & routing**: Cisco IOS (Catalyst 2960X, 2960L, 9300), VLAN 802.1Q, inter-VLAN routing, OSPF, BGP<br>▸ **Enterprise Wi-Fi**: Ruckus, Ubiquiti UniFi, FortiAP<br>▸ **Firewall**: FortiGate (policies, IPS, application control, web filtering, captive portal, IPsec VPN, SD-WAN), FortiAnalyzer, FortiManager, pfSense<br>▸ **Detection & analysis**: Wazuh (SIEM), Kaspersky EDR, Wireshark, Nmap, Kali |
| **Automation & DevOps** | ▸ Ansible, Bash, Python, Git / GitLab, Docker & Docker Compose; Kubernetes and Terraform fundamentals |
| **Frameworks** | ▸ ISO/IEC 27001, ISO/IEC 27005, NIST CSF, CIS Benchmarks, ITIL v4 |

## PROFESSIONAL EXPERIENCE

### Technical Officer — Systems, Network & Security Administrator

**Feb 2022 – Present**

**National Agency for Information and Communication Technologies (ANTIC)**

Yaoundé, Cameroon

*Information Systems Unit (CSI) — ICT Studies & Development Division*

**Infrastructure & Virtualization**

- Operate production infrastructure: HPE ProLiant Gen9/10/11 servers, vSphere and Proxmox VE clusters, HPE MSA 2050/2060 SAN over Fibre Channel and Ethernet; ESXi upgrades, VM migration and consolidation, HA/DRS optimization; administration of Linux and Windows servers.
- Designed backup, replication and restore architectures and procedures for virtual machines and containers (Veeam Backup & Replication, Proxmox Backup Server, NAS) with defined RPO/RTO targets.
- Implemented and operate DNSSEC signing of the national .cm ccTLD in collaboration with ICANN; hardened the configuration of the authoritative DNS servers (BIND 9.18) for the .cm and antic.cm zones.

**Security & Compliance**

- Developed ANTIC's Information Systems Security Policy (ISSP) and the technical documentation for information system administration.
- Administer the central FortiGate firewall (security policies, IPS, application control, web filtering, captive portal, multi-ISP policy-based routing); analyze security logs and events in FortiAnalyzer.
- Automated CIS Benchmark hardening and compliance auditing of Linux servers with Ansible; vulnerability scanning, SIEM integration (Wazuh), antivirus and EDR for end users.

**Automation & DevOps**

- Set up the internal GitLab forge on Docker to manage source code, playbooks and infrastructure scripts.
- Deployed a Teleport privileged-access bastion (SSH, RDP, web admin consoles, MFA).
- Deploy business applications and internal platforms with Docker Compose; administer databases.

- Set up Prometheus and Grafana monitoring.
- Built an on-premises AI assistant pilot (Ollama, Open WebUI, Qdrant RAG, Docker Compose) sized for 250 users; wrote the technical specifications for the GPU server that will host the models.

**Projects, Support & Mentoring**

- Manage public investment projects (technical specifications, project maturation documents, technical bid evaluation committees) and support public administrations and municipalities with their IT master plans.
- Supervise cybersecurity, networking and telecommunications interns (Bachelor's and Master's level); provide L1–L3 support and oversee IT contractors and suppliers.

### IT Infrastructure Intern

**Apr – Sep 2021**

**Aéroports du Cameroun (ADC) — Yaoundé-Nsimalen International Airport**

Yaoundé, Cameroon

*Power Plant Department — Critical Electrical Infrastructure*

- Optimized the Computerized Maintenance Management System (CMMS) used to plan and track maintenance of critical electrical installations.
- Took part in maintenance operations, wrote technical reports and tracked key performance indicators.

## BADGES & CERTIFICATIONS

| | |
|---|---|
| CCNA: Enterprise Networking, Security and Automation | ***Cisco*** |
| Fortinet NSE 5 | ***Fortinet*** |
| ISO 27001 Lead Implementer | ***PECB*** |
| AWS Cloud Practitioner | ***Amazon Web Services*** |
| AWS AI Practitioner | ***Amazon Web Services*** |
| Linux Foundation Certified System Administrator (LFCS) | ***The Linux Foundation*** |
| Kubernetes and Cloud Native Associate (KCNA) | ***The Linux Foundation*** |
| Linux Foundation Certified IT Associate (LFCA) | ***The Linux Foundation*** |
| Bash (SC103), YAML (SC104), JSON (SC105) | ***The Linux Foundation*** |
| Containers with Docker (SC109) | ***The Linux Foundation*** |

## EDUCATION

**Master's Degree — Electrical & Industrial Computer Engineering (M.Sc.)** — **2021**
*Cameroon*

**Engineer's Diploma — Computer Systems & Networks** — **2019**
*Cameroon*

**Scientific Baccalaureate** — **2015**
*Cameroon*

## LANGUAGES

**French** — Native
**English** — Professional / Technical
